No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 11,

GENERALL INFORMATION:
APPLICANT: Large Scale Biology Corporation
APPLICANT: Large Scale Biology Corporation
APPLICANT: Large Scale Biology Corporation
APPLICANT: Turpen, Thomas H.
APPLICANT: Erwin, Robert L.
APPLICANT: BOOUCTION OF INSOME ENCYMES IN PLANTENT EXPRESSION
CURRENT FILIK DATE: 2003-6-23
CURRENT FILIK DATE: 2001-11-13
FRIOR APPLICATION NUMBER: 09/626,127
FRIOR APPLICATION NUMBER: 09/626,127
FRIOR APPLICATION NUMBER: 09/16,572
FRIOR APPLICATION NUMBER: 09/16,572
FRIOR APPLICATION NUMBER: 09/16,414
FRIOR FILING DATE: 1994-10-14
FRIOR FILING DATE: 1994-10-14
FRIOR FILING DATE: 1994-01-19

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

Submitted (20-JUL 2004) Genoscope - Centre National de Sequencage: Submitted (20-JUL 2004) Genoscope - Centre National de Sequencage: BP 191 91006 EVRY cedex - FRANCE (E-mail : seqref@genoscope.cns.fr - Web: www.genoscope.cns.fr) and ist strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pcMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

- Web : www.genoscope.cns.fr)
1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invirogen.
                                                                                                       1146
                                                                                                                                                                                          LKOL/861 1253 bp mRNA linear HTC 21-JUL-2004 full-length cDNA clone CSODKO09YE12 of HeLa cells Cot 25-normalized of Homo sapiens (human).
                                                                                                                      1026

AKO54547 AKO54547 Mus musculus 2 days pregnant adult female ovary cDNA, RIKEN Full-length enriched library, clone:E330039008 product:galactosidase, alpha, full insert sequence. AKO54547 AKO54547 Mus musculus (house mouse) Mus musculus (house mouse) Mus musculus (house mouse) Sukaryota; Metazoa; Chordata; Craniata; Vertebrata; Buteleostomi; Mammalia; Eutheria; Euarchontoglires; Glires; Rodentia; Sciurognathi; Muridae; Murinae; Mus. Carninci, P. and Hayashizaki, Y. High-efficiency full-length cDNA cloning		Sumi, N., Ishii, Y., Nakamura, S., Hazama, M., Nishine, T., Harada, Yamamoto, R., Matsumoto, H., Sakaguchi, S., Ikegami, T., Kashiwagi Yujiwake, S., Inoue, K., Togawa, Y., Izawa, M., Ohara, B., Watshikaya, Yoneda, Y., Ishikawa, T., Ozawa, K., Tanaka, T., Matsuura, S., Kawa Okazaki, Y., Muramatsu, M., Inoue, Y., Kira, A. and Hayashizaki, Y. RIKEN integrated sequence analysis (RISA) system-384-format sequencing pipeline with 384 multicapillary sequencer Genome Res. 10 (11), 1757-1771 (2000)	The RIKEN Genome Exploration Research Group Phase II Team and the FANTOM Consortium. FUNCTIONAL annotation of a full-length mouse cDNA collection Nature 409, 685-690 (2001) The FANTOM Consortium and the RIKEN Genome Exploration Research Group Phase I & II Team. Analysis of the mouse transcriptome based on functional annotation of 60,770 full-length cDNAs Nature 420, 563-573 (2002)		Muramatsu, M. and Hayashizaki,Y. Direct Submission Submitted (16-UTU-2011) Yoshihi Physical and Chemical Research Exploration Research Group, RIKEN Yokohama Institute, 1-7-2; Kanagawa 230-0045, Japan (E-mai: URL:http://genome.gsc.riken.jp/	raxial-45-500-7410) cDNA library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoR V sites of the pCMYSORT & vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          1026

18t strand cDNA was primed with a NotI-oligo(dT) primer. Five prime

end enriched, double-strand cDNA was digested with Not I and cloned

into the Not I and EcoR V sites of the pCWVSPORT 6 vector. Library

was normalized. Library was constructed by Life Technologies, a

division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        185
